We believe that a child's imagination is the founding stone for a great future. From here came the whole idea and we came up with Carleton's slogan "Powering Imagination."

The whole identity is built on the power of children's imagination and that Carleton does everything possible to empower their imagination and creativity.
Regarding the logo, we used the lion icon as it shows power and greatness which indicates the great future that awaits kids and the courageous leading characters they will turn out to be.

Concentrating on the fact that there is more to education than just feeding children information.

We worked on demonstrating 3 important advantages that the school offer:

Education that initiates creative thinking.
Developing passion in children.
Building skillful characters.
